WHAT IS PrEP?

PrEP is a pill that will reduce your risk of acquiring HIV.

PrEP

Taking a pill once a day correctly and consistently can reduce your risk of contracting HIV by more than

90%

With PrEP, all it takes is a *pill* a day to keep HIV away!

1
a day

PrEP on pregnancy & STIs

PrEP is not contraception or protection against STIs

PrEP SIDE EFFECTS

PrEP
is just like any other medication and has minor side effects which will likely go away in a few weeks.

PrEP SIDE EFFECTS

A small number of people experience minor side effects like:

- Weight loss
- Nausea
- Vomiting

PrEP SIDE EFFECTS

More side effects:

- Headaches
- Upset stomach

However, they are likely to go away in the first few weeks.

Contradictions: other medication, drugs & alcohol

But make sure to keep yourself **safe** if having sex by using condoms to protect yourself from other **STIs** and **pregnancy** when using alcohol and drugs.

Contradictions: other medication, drugs & alcohol

Yes. You can take **PrEP** if you are taking other medications. **PrEP** will not affect other medications.

Contradictions: other medication, drugs & alcohol

Alcohol and other drugs won't affect how **PrEP** works if **PrEP** is taken consistently and correctly.

Where can I find PrEP?

PrEP can be found at the **SHAZ! Hub**,
Citimed Hospital in Zengeza 4, Chitungwiza.
Call hotline: **+263 (0) 242 121807**.

Does PrEP need to be taken every day, for life?

No, PrEP is only taken while at risk of getting HIV.
When you feel that you are no longer at risk
you can talk to your healthcare provider about
stopping PrEP.

Protect the life you live!

Protect the life you live for yourself and
those who care about you. PrEP helps keep
us all safe, strong and HIV free.
